Personal statement

A highly motivated professional with an MBA majored in Digital transformation and a seasoned systems developer with a strong foundation in front-end technologies (HTML/CSS, JavaScript, React), coupled with expertise in Power Apps, Power BI, SharePoint list, SQL, Node.js, and Express, I bring a holistic approach to application development. My versatile skill set allows me to seamlessly bridge the gap between front-end and Power Platform, creating dynamic and efficient solutions that drive user engagement and enhance overall functionality.

I am seeking exciting career opportunities in the dynamic landscape systems Development. I believe my passion for development and experience, education at master's level and being adept at leveraging cutting-edge development tools and methodologies to solve business problems with software solution will enhance organizational performance are of great benefit to organisations.

Key skills and attributes

Power APPS, Power BI, SQL, HTML/CSS, JavaScript, React, Tailwind CSS, Bootstrap, Excel, Unit4 Agresso, SharePoint, MS Office, Outlook

System Development, Swim Lane, Responsive design, Canvas Driven apps, Database Management, Data Visualization, Business transformation, Critical Thinking, Communication Skills, Domain Knowledge, Agile Stakeholder Management, Strategic Thinking, Project Management.

Projects

Part-time hourly paid authorisation process (Power Apps)

- Created six enterprise level Apps for different authorisation stakeholder (Header, Costing, Finance BP, Head of service, Exec, HR).
- Created email and PDF mechanism to notify to next authoriser asking for their input.
- Created dynamic link to filter the app based on job title being requested.
- Used Microsoft List for storing the inputs.
- Power BI for tracking the workflow.
- Scripted and recorded video and documented how to guide for reference for new users.

Personal Portfolio Website (React)

- Developed a responsive and visually appealing user interface using React, CSS, and JavaScript, ensuring optimal user experience across various devices and screen sizes.
- Implemented dynamic content rendering and interactive features using React components and JavaScript functionalities, enhancing user engagement and providing a seamless browsing experience.

Experience

Nov. 2022 to Present

University of Gloucestershire

Assistant Finance Systems Accountant

- Utilised Power Apps to create an application to streamline the PTHP recruitment process which helped university reduce their standard authorisation process from 1 week to 30 mins.
- Managing and maintain previously built apps based on Power Apps.
- Managing and maintaining Work Allocation Management System (WAMS).
- Visualising findings on Power BI from large SQL database to identify trends, patterns, and insights to interpret data and provide meaningful conclusions from finance data.
- Analysed university financial data to create dashboards and provide timely reports using SQL, Excel, and Power BI for the senior academic decision-makers.
